LCD module

Easy and User Friendly

- Easy to check the running status with the LCD screen
- Plug and play design for easy installation
- No need for an external power supply

Smart and Convenient

- Remote monitoring via www.solarinfobank.com or the SolarInfo Home app (available on Android and iOS), including email reports and alerts
- Smart cloud server monitoring for centralised operation, maintenance and management

Technical Specification

Interface	RS485 and DRM (only for Australia)
Communication	RS485 and Wi-Fi (optional)
Power supply	From the inverter
Ambient temperature	-25°C to 60°C
Protection rating	IP65
Dimensions (W×H×D)	101 mm × 123 mm × 37 mm
Weight	0.8 kg
Installation method	Wall-mounting bracket
